

TYRON

Flat Tyre Protection

The Tyron Multiband allows you to get to a place of safety after a blow out....

Stay in control when Punctures and Blowouts strike....Fit TYRON Multibands

As roads and motorways become more congested driver and passenger safety is a key concern and the ability to drive to a convenient layby in the event of a puncture.

Especially now Smart Motorways have very little protection in the event of an emergency....

Whilst driving your vehicle you are vulnerable to serious danger if a Blow-Out should happen....

With Tyron Multibands fitted, you convert your standard vehicle wheels to safety wheels, locking the tyre to the wheel.

This helps maintain steering, braking & cornering control during a high speed blow-out & gives short distance RunFlat capability so you can drive to a place of safety to change your wheel.
